

THE OPTICAL INDUSTRY & SYSTEMS PURCHASING DIRECTORY

Published: annually

Aim: to provide designers, engineers, scientists, managers and purchasing agents representative of industries worldwide with the most complete purchasing and reference information on the optical/electro-optical/laser/fiber optic industry.

Format: Two-book set. Book 1 contains the Buyers' Guide, Address Section, Geographical Section and Technology Overview. Book 2 contains the Encyclopedia, Dictionary, Product Tables, Abbreviations and Symbols, and Handbook Information.

Now available: the 27th edition of

Your complete purchasing and reference tool for the multi-billion dollar optical/electro-optical/laser/fiber optic industry.

Two books over 1000 pages

Both cover fields that include fiber optics, lasers, image processing, remote sensing, infrared technology, coating technology, spectroscopy, holography, solar energy, optical materials, optical equipment, optical design, display technology, detectors and vacuum equipment.

Book 1

The first book, the 1981 Buyers' Guide, contains:
Two Complete Indexes, alphabetical and product category ● Over 1000 Categories of products and services, listing the companies that offer them ● An Address Section for over 1800 international manufacturers and suppliers ● A Geographical Section, listing manufacturers by city and state ● The Technology Overview section, which capsules the latest major events that have taken place in the optical/electro-optical/laser/fiber optic industry.

THE OPTICAL INDUSTRY & SYSTEMS PURCHASING DIRECTORY

My check, payable to The Optical Publishing Co., Inc., is enclosed (\$38.50 for USA copies; \$42.50 for outside USA). Please ship the two-book set to:

Name _____ Title _____

Company _____ No. of Employees _____

☐ Home or

☐ Office Address _____

(We ship domestically by United Parcel Service, which does not deliver to P.O. Boxes)

City _____ State _____ Zip _____

Signature _____

Book 2

The second book, the 1981 Encyclopedia/Dictionary/Product Tables contains: The Encyclopedia, a thorough reference to the over 110 fields in this industry ● The Dictionary, which contains over 4500 technical terms in this technology ● Product Tables of coating services, crystals, detectors, displays, fiber optics, filters, gratings, lasers, lenses, mirrors, modulators, optical design and engineering services, positioning devices, power supplies, prisms and vacuum equipment ● Handbook Data, which provides quick and easy access to valuable reference material ● Abbreviations and Symbols most commonly used in the technology.

Your Complete Guide to the Optical/Electro-Optical/Laser/Fiber Optic Technology.

Now in 2 Books with over 1000 Pages.

Book 1 contains the Buyers' Guide, Address Section, Geographical Section and Technology Overview.
Book 2 contains the Encyclopedia, Dictionary, Product Tables, Abbreviations and Handbook.
